

CASE STUDY

With PriceMDs NCIS Solution, Participating Employers Saw **A 13.8-Percentage-Point Renewal Difference**

Physicians Collaborative Health (PCH) | Multi-State Captive

The Approach

TheNearCare™ Imaging & Surgery (NCIS) Solution

Reduces surgical and imaging plan costs by nearly 50% with all-inclusive bundled pricing, while giving members access to 3,600+ facilities nationwide and dedicated nurse support throughout their care journey.

PCH Partnered with PriceMDs

To offer NCIS as a optional bolt-on surgical solution for its employer groups. Members gain access to 400+ non-emergent procedures at \$0 member cost, while employers can choose between a low PEPM or shared-savings model.

The Results

1.3% Average Renewal
Increase Using NCIS

15.1% Average Renewal
Increase Not Using NCIS

The Impact

Within the captive, employer groups using NCIS experienced lower average renewal increases than those that did not participate, showing how reducing high-cost surgical spend can support stronger plan performance and lessen the financial pressure that carries into renewal.

“Our employees had an incredibly positive experience with the program. We saw significant savings, the care experience was better, and employees were sending me thank-you notes. After seeing those results, it was hard to understand why more groups weren’t taking advantage of it.”
